Office Action Summary	Application No. 10/530,917	Applicant(s) LEETSCH ET AL.	
	Examiner Virginia Manoharan	Art Unit 1797	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

The specification has not been checked to the extent necessary to determine the presence of all possible minor errors, e.g., typographical, grammar, idiomatic, syntax and etc. Applicants' cooperations requested in correcting any errors of which applicants may become aware in the specification.

The disclosure is objected to because a reference to and brief description of the drawing(s) as set forth in 37 CFR & 1.74 is/are missing from the specification.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

a). The term "characterized in that", recited in claims 1-5, is not a recitation of positive, manipulative, method/process steps. Also, it is unclear whether the limitation(s) recited prior the "characterized in that" is to be regarded as part of applicants' invention? Applicants should recite the claim in Jepson -format (if intended) to delineate that which is an improvement in the art.

b) The increasing and decreasing steps, recited in claim 3, provide for ambiguity as they are at odd with one another.

c). The claims or at least part of the claims are recited in passive rather than active steps, e.g., the recitation of "by distillation " in claim 1; and "by increasing the portion of non-condensable" in claim 3 .

d). The inconsistent use of terminology in the claims is improper. For example: "a solution of a HA salt" in claim 1, line 2, as opposed to "the HA solution " in claim 1, line 3.

e). Claim 1 recites the limitations "the process temperature" and "the column inlet". There are insufficient antecedent basis for these limitations in the claim.

f). The parenthetical statement in a claim is improper as every feature recited in a claim becomes a part of the overall subject matter. By placing terms in parenthesis renders the claims ambiguous as to whether or not the phrase should be disregarded. Note "(aqueous solution of HA salt)" in claim 5.

Claims 1-5 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

a). Bansho et al discloses a process for producing free hydroxylamine aqueous solution.

b). Wostbrock et al discloses a method of producing an aqueous HA solution by distilling using steam as stripping agent.

c). Cawfield uses a combination of an inert gas and steam as stripping agent in a multistep process of producing HAN.
